Professional Experience

Freelance Full Stack Developer

08/2023 - Present

- Developing customized web applications for small and medium-sized businesses.
- Creating responsive and user-friendly interfaces using React.js.
- Implementing RESTful APIs and integrating databases with Node.js and MySQL.
- Collaborating with clients to gather requirements, suggest improvements, and deliver scalable solutions.

Municipality of São Bernardo do Campo

06/2023 – 12/2024

Position: Full Stack Developer

- Developed internal web applications using Java and JavaScript to support administrative workflows.
- Built user interfaces with React.js and integrated backend services using Spring Boot.
- Created and maintained APIs, handled database operations, and ensured application scalability.
- Worked closely with administrative teams to automate processes and improve system usability.

Developed Projects

1. Internal Management System – Government Project (Confidential)

Contributed to the development of an internal management system for a public sector organization. The project aimed to digitize and automate administrative workflows, improve data accessibility, and enhance interdepartmental communication. Due to confidentiality agreements, specific details cannot be disclosed.

- Technologies: Java, Spring Boot, React.js, JavaScript, PostgreSQL.
- Highlights:
 - Collaborated on building a secure, modular full stack system following best practices for government applications
 - Developed front-end interfaces with React.js, focusing on usability and accessibility for non-technical users
 - Implemented RESTful APIs and backend services using Java and Spring Boot
 - Participated in code reviews, testing, and deployment to ensure system reliability and scalability

2. ERP for Logistics Company ([Link](#))

Freelance project under development in my free time: an ERP platform tailored for a logistics company. The system is being built with a microservices architecture to ensure modularity, high scalability, and ease of maintenance.

- Technologies: Node.js, React.js, JavaScript e MySQL.
- Highlights: Microservices-based architecture with internal API communication, modern and responsive front-end using React.js, designed for performance and scalability.

3. Personal Finance Website ([Link](#))

A project created to help individuals manage their personal finances more efficiently.

- Technologies: MySQL, PHP, JavaScript, HTML, CSS
- Highlights: Features for recording and categorizing expenses (Desktop only).

4. My Portfolio ([Link](#))

Professional portfolio to showcase developed projects and technical skills.

- Technologies: React, JavaScript, HTML, CSS
- Highlights: Responsive and interactive layout, focused on user experience.
